

About the University and Department

Sikkim University is a central University established in 2007 by an act of Parliament of India. At present the University has 32 academic departments organised under 6 School of Studies. With the vision of emerging as a hub of higher education in the Eastern Himalayas, the University is committed for providing quality education at affordable cost. The department of Education was established in 2013 under the School of Professional Studies. At present the Department is offering three programmes- M.A, M.Ed & Ph.D in Education.

How to Reach

Nearest railway station is New Jalpaiguri (NJP) and airport is Bagdogra (IXB) which is about 120 Km from Gangtok. Shared taxis to Gangtok are available from both places. Buses are available from Sikkim Nationalised Transport Stand at Siliguri. The climate of Gangtok during November may be slightly cold. Woollens may be required.

Accommodation

Accommodation will be provided for outstation participants on nominal charges.

ON

**Recent Trends in Educational
Psychology**
November 11-12, 2019

Organised by
Department of Education
Sikkim University
(A Central University)
6th Mile, Samdur, Tadong,
Gangtok, Sikkim- 737102

Significance of the Seminar:

In the present era of rapid change, competition, rising expectations and available options, there is a surge of conflicts, stress, frustrations and anxieties in daily life. As Psychology is the study of people's behaviour, performance, and mental operations. In every field of education, we find contribution of educational psychology which has become a very special field of its own. To understand the behaviour of human beings, especially children undergoing the process of education, the first important thing is to understand the needs of the learner in his various situations. The learner is an individual and as such a unique personality. So we have to understand the reasons of individual differences. The problems of the personality development, the emotional, social and intellectual development of the child, thus occupy a very important part of educational psychology. To understand the mental development of the child, one must also know the physical development of the child. It is a growing Science and is continuously enriching itself through results of various researches on the learner and learning situations. We can also put various questions, in what spheres Educational Psychology can be used by the teachers.

In this seminar we will focus on such recent trends in Educational Psychology. It will explore several themes that recur in the reforms in Educational Psychology. It will provide platform to the educationists and research scholars to think over the changing scenario in the field of Educational Psychology. The theme of the seminar proposed is "Recent Trends in Educational Psychology"
